Erode, Tamil Nadu

Open to relocation / remote

EDUCATION

Hindusthan College of Engineering

BE — Electrical & Electronics

Coimbatore, Tamil Nadu

CGPA: 6 | Grad: Mar 2019

SKILLS

BACKEND

FastAPI · Python · REST API

Async Programming · Pydantic

FRONTEND

React.js · Next.js · TypeScript

Tailwind CSS · JavaScript

DATABASE

PostgreSQL · MySQL · SQLite

DEVOPS & TOOLS

Docker · GitHub Actions (CI/CD)

Git · Linux CLI · API Testing

AUTH & BILLING

Clerk (JWT / OAuth) · Paddle

TECH PROFILE

GitHub — github.com/bharanitharanm

ACHIEVEMENTS

Reduced CI/CD release steps from 8 → 1

Maintained 99%+ accuracy over 500+ docs/month

Promoted to QA within 3 months

Trained 6 members → 20% throughput gain

LEARNING

Advanced FastAPI patterns

Production logging & tracing

Unit of Work pattern

Backend system design & scalability

EXPERIENCE

Visual AI Agent Builder | Full Stack Developer Nov 2024 – Present

Early-stage SaaS Startup • Remote

- Engineered a **multi-tenant SaaS platform** for visual AI workflow orchestration, implementing **Clerk JWT-based RBAC** for 3+ independent tenants — eliminating unauthorized cross-tenant data access entirely.
- Integrated **Paddle subscription billing** across FastAPI + React.js with tiered pricing and conditional UI rendering — **reducing manual billing overhead to zero** and enabling self-serve monetization.
- Designed a **parameterized GitHub Actions CI/CD pipeline** with Docker image builds and environment-aware deployments, **cutting manual release steps from 8 to 1** and eliminating environment mismatch errors.
- Refactored monolithic backend into **modular components (routers, services, models)** following clean architecture — reduced PR review time and improved unit testability across the codebase.
- Built a full-stack **internal ticketing & real-time support system** (FastAPI + Next.js) with persistent storage, paginated REST APIs, and role-based workflow handling.

Tech stack: FastAPI, React.js, Next.js, PostgreSQL, Docker, GitHub Actions, Clerk, Paddle, TypeScript

SKP Title Search Pvt Ltd | Title Search → Quality Analyst Jun 2020 – Mar 2023

- Reviewed and validated **500+ US real estate title commitments/month**, maintaining **99%+ accuracy** with zero compliance escalations across the entire tenure.
- Promoted to Quality Analyst in **3 months**; built structured review workflows and QA benchmarks **adopted team-wide** across 6+ reviewers.
- Trained **6 team members** on document review best practices, contributing to a **20% improvement in team throughput**.

PROJECTS

Primitive-Chat — Support Ticketing Module Nov 2024 – Present

FastAPI · Next.js · PostgreSQL · REST APIs

- Architected a **full-stack issue-tracking system** end-to-end using FastAPI and Next.js; designed **paginated REST APIs** handling complete ticket lifecycle from creation to resolution with role-scoped access control.
- Modeled a **PostgreSQL schema for multi-state ticket management** (users, roles, ticket states) and wrote **unit tests for core API modules** — ensuring stable releases and catching regressions before deployment.
- Delivered customized **chat UI and frontend workflows** in Next.js that streamlined support interactions, **reducing issue-reporting friction** for end users.
